

MOTOR SURVEY MANAGEMENT SOFTWARE

Client User Manual, Feature Changelog & Visual Release Guide

Production Platform: <https://skinsurance.tech> | Release Version: v2.3.0 (August 2026 Production Build)

Client / Surveyor:	Sk Anowar Ali (Licensed Motor Surveyor & Loss Assessor)
Licence & Contact:	SLA-121784 Mobile: 8777370714 Email: skanowarali93@gmail.com
Scope of Release:	Word Fee Bill Generator, Dual Invoicing, Document Reminders, Photo Fixes, Role Security & CI/CD

1. Executive Summary & Enhancements Overview

This production release (v2.3.0) delivers a complete operational upgrade to the Motor Survey Management platform at skinsurance.tech. The system provides complete operational automation for survey job tracking, document collection reminders, master insurer directory setup, official Word-replica professional fee billing, and vehicle damage photo attachments.

Summary of Core Enhancements

- 1. Word Template Fee Bill Generator:** Pixel-perfect replica of the official Word template (rgi fees with signature.docx) with checkbox line items, automatic conveyance formulas, 18% GST, and digital seal/signature toggles.
- 2. Dual Fee Invoicing Workflow:** Seamlessly generate fee bills linked to claim survey reports (Report No. auto-linked) or standalone fee bills with sequential numbers (NIC-0001, OGI-0001).
- 3. In-Place Dashboard Drilldown:** Clicking any KPI card filters claims immediately below the cards without losing workspace context.
- 4. Missing Documents Checklist Modal:** Granular document tracking with dynamic custom items and 3-cycle automated reminder notices.
- 5. Insurer Master Management:** Centralized directory for Insurer addresses, GSTINs, default rates, and billing prefixes.
- 6. Damage Photo Upload & PDF Fix:** Drag-and-drop HD photo uploader with normalized PDF embedding, eliminating 'Error loading image' issues.
- 7. Role Security & Financial Redaction:** Employee role (USER) is completely restricted from fee registers, billing routes, and financial revenue KPIs.
- 8. Automated 1-Click CI/CD:** Direct push-to-deploy pipeline running over authenticated HTTPS webhooks with automated asset cache-busting.

2. Feature Walkthrough & Operating Guide

Feature 1: Official Motor Survey Fee Bill Generator (Word Template Replica)

- Where to Find:** In the top navigation bar, open the 'Survey Fee Register' tab (#tab-fees).
- How it Works:** Select dynamic line-item checkboxes for Final Survey Fees, Local/KM Conveyance, 2nd Visit Conveyance, Re-inspection, Photos, Halting charges, and Other charges. Calculates Taxable Subtotal, SAC Code 997162, 18% GST, and Gross Total.

The screenshot displays the 'Motor Survey Report Generator' interface. At the top, there's a header with 'Welcome, NAMAN', 'Admin', 'Settings', 'Logout', and 'Connect Drive' buttons. The main section is titled 'Survey Fee Register' with a subtitle 'Income tracking, GST billing, GST export, and CA reports.' Below this is an 'Upload Policy / RC Copy (PDF)' section with an 'Upload PDF' button. The form is divided into several sections: 'Link with Existing Survey Claim' (with a dropdown for 'Standalone Fee Bill (No Linked Claim)'), 'Report No.' (e.g., K08/G4/24/1365), 'Bill / Invoice No.' (e.g., KG-2365, NIC-0001), and 'Bill Date' (dd-mm-yyyy). The 'Insurer (Recipient) Details' section includes 'Insurer Name' (e.g., IndusInd General Insur), 'Insurer GSTIN' (e.g., 19AAACB6747B1ZD), 'Insurer Branch Address' (e.g., 4th Floor Thapar House), and a 'Select Insurer Master' dropdown. The 'Claim & Vehicle Particulars' section includes 'Policy No.' (Policy Number), 'Claim No.' (Claim Number), 'Vehicle No.' (e.g., WB-01-AB-1234), 'Insured Name' (Insured Person / Company), and 'Date of Accident' (e.g., 04/07/2026). The 'Itemized Fee Breakdown (Word Template)' section shows a table with columns for 'Item', 'Amount', and 'Formula'. It includes '1. Final Survey Fees' (2000), '2. Conveyance Expenses' (Kolkata to Nabadwip, 800.00), and '3. 2nd visited Conveyance Expenses' (Route: Kolkata to Mumbai, Amount: Rs. 10). Each item has a checkbox and an 'Apply KM' button.

Figure: Survey Fee Register Form with Checkbox Line Items & Live Calculations

Official Conveyance & GST Calculation Formula

Conveyance Formula: <From> to <To> (<One-Way KM> x 2 = <Total KM> km @ Rs. <Rate>/-)

Taxable Amount = Selected Fee Items (Survey + Conveyance + Photos + Halting + Misc)

GST Amount (18%) = Taxable Amount x 0.18

Gross Bill Total = Taxable Amount + GST Amount (18%)

Example: Rs. 1,500 (Survey) + Rs. 500 (Conv) + Rs. 200 (Photo) = Rs. 2,200 Taxable | Rs. 396 GST | Rs. 2,596 Gross Total

Feature 2: Word Template Replica PDF Output & Dual Invoicing

- Word Template Replica:** Generates pixel-perfect fee bills matching rgi fees with signature.docx including Surveyor Header, Insurer GSTIN, 2-Column Claim info, and Bank Account Footer.
- Dual Invoicing Workflow:** Supports Claim-linked bills (Report No. auto-linked) and Standalone bills with sequential Bill No. (e.g. NIC-0001).

Feature 3: Operational Dashboard & Role-Based Permissions

- **Dashboard Drilldown:** Clicking any KPI card highlights it and renders the filtered claims table directly below without reloading.
- **Role Security:** Admin (NAMAN) has full access to financial tools, while Employee (USER) has financial fee registers redacted for business privacy.

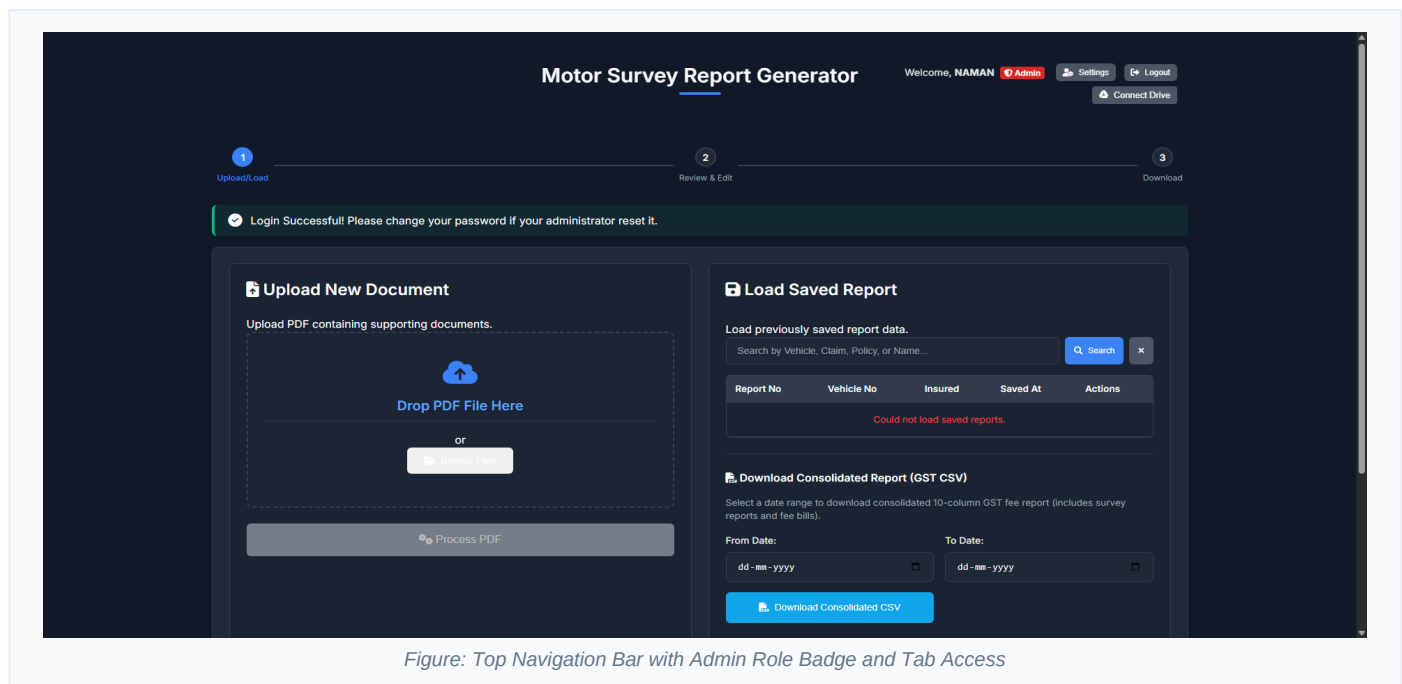

Figure: Top Navigation Bar with Admin Role Badge and Tab Access

Feature 4: Insurer Masters, Documents Checklist & Photo Fixes

- **Master Insurer Directory:** Stores company GSTINs, branch addresses, default rates, and auto-prefix rules.
- **Documents Checklist:** Granular checklist with 7-day automated client reminder notices.
- **Photo Embedding Fix:** Stream normalization in background workers guarantees clean rendering in survey reports.

3. Automated Backups & System Maintenance

- **Daily Nightly Backup Cron:** Automatically dumps and compresses the PostgreSQL database every night to /root/backups/ with 14-day rotation.
- **Automated SSL Renewal:** Let's Encrypt SSL certificates renew automatically via certbot.timer on Nginx.
- **1-Click Push-to-Deploy:** Running 'python scripts/deploy.py' triggers the authenticated webhook on the VPS in ~3 seconds.

4. User Credentials & Access Summary

The table below details default login credentials and permission scopes configured on <https://skinsurance.tech>:

Account Role	Username	Default Password	Permitted Capabilities
Administrator	NAMAN	69420	Full Access (Operations, Fee Register, GSTR-1, Settings)
Employee / Staff	USER	UH65A#DF	Operational Access (Claim Register, Survey Reports, PDF Download)

Client Operational Advice & Google OAuth Setup

- Google OAuth Redirect URIs: Set Web application URIs to:
 - * Google Drive: <https://skinsurance.tech/auth/google/callback>
 - * Gmail Sync: <https://skinsurance.tech/auth/gmail/callback>
- Password Customization: Passwords can be changed anytime via Settings -> User Profile.
- Cache-Busting: All updates reflect immediately without needing to clear browser cache.
- Developer Contact: For support or custom report adjustments, reach out directly.
