

MOTOR SURVEY MANAGEMENT SOFTWARE

Client User Manual, Feature Changelog & Visual Release Guide

Production Platform: <https://skinsurance.tech> | Release Version: v2.2.0 (August 2026)

Client / Surveyor:	Sk Anowar Ali (Motor Surveyor & Loss Assessor)
Licence & Contact:	SLA-121784 Mobile: 8777370714 Email: skanowarali93@gmail.com
Scope of Release:	Requirements R1-R6, Role Partitioning, GST Fee Calculations & Zero-Friction CI/CD

1. Executive Summary & Enhancements Overview

This release delivers major upgrades to the Motor Survey Management platform at skinsurance.tech. The system provides complete operational automation for survey job tracking, document collection reminders, master insurer directory setup, whole-rupee professional fee calculations, and vehicle damage photo uploads.

Summary of Core Enhancements (R1 - R6)

- R1 - In-Place Dashboard Drilldown:** Clicking any KPI card filters claims immediately below the cards without losing context.
- R2 - Missing Documents Checklist Modal:** Granular document tracking with dynamic custom items and multi-cycle reminder notices.
- R3 - Insurer Master Management:** Centralized directory for Insurer addresses, GSTINs, default rates, and billing prefixes.
- R4 - Smart Auto-Prefix & Invoicing:** Auto-derives standard acronyms (NIC, OGI, UIIC) and fetches sequential invoice numbers.
- R5 - Fee Stepper & Live Summary:** Whole-rupee precision (step=1) and real-time live card showing Taxable, 18% GST, and Gross Total.
- R6 - Photo Upload Diagnostics:** Batch drag-and-drop HD vehicle photo uploader with client-side throttling to prevent false quota errors.
- Role Security & Redaction:** Employee role (USER) is completely restricted from fee registers, billing routes, and financial KPIs.
- Automated Push-to-Deploy:** Direct GitHub webhook pipeline deploying code updates in ~3 seconds with dynamic cache-busting.

2. Feature Walkthrough & Visual Proof

Feature 1: Operational Dashboard & In-Place Drilldown (Requirement R1)

- Where to Find:** Click the 'Dashboard' navigation tab on the top menu.
- How it Works:** Clicking any KPI metric card (e.g. Documents Awaited) highlights the card with a blue border (.active-metric-card) and opens the filtered claims table directly below the KPI grid in #dashboard-drilldown-section.

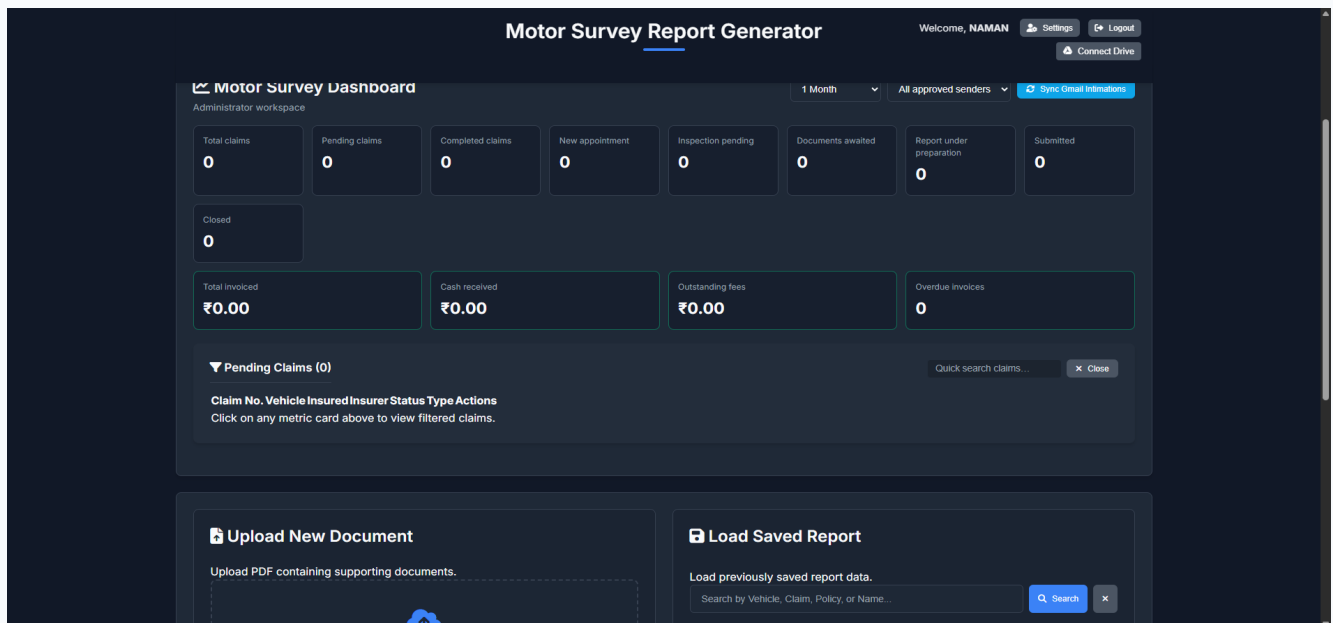

Figure: Requirement R1: In-place claim drilldown rendered directly below dashboard KPI cards

Feature 2: Missing Documents Checklist & Reminders Modal (Requirement R2)

- Where to Find:** In the Claim Register, click the 'Docs' button on any active claim row.
- How it Works:** Opens a checklist modal showing required documents (RC, DL, Policy, Claim Form, FIR, Estimate). Allows adding custom documents and tracks 7-day 3-cycle reminder notices.

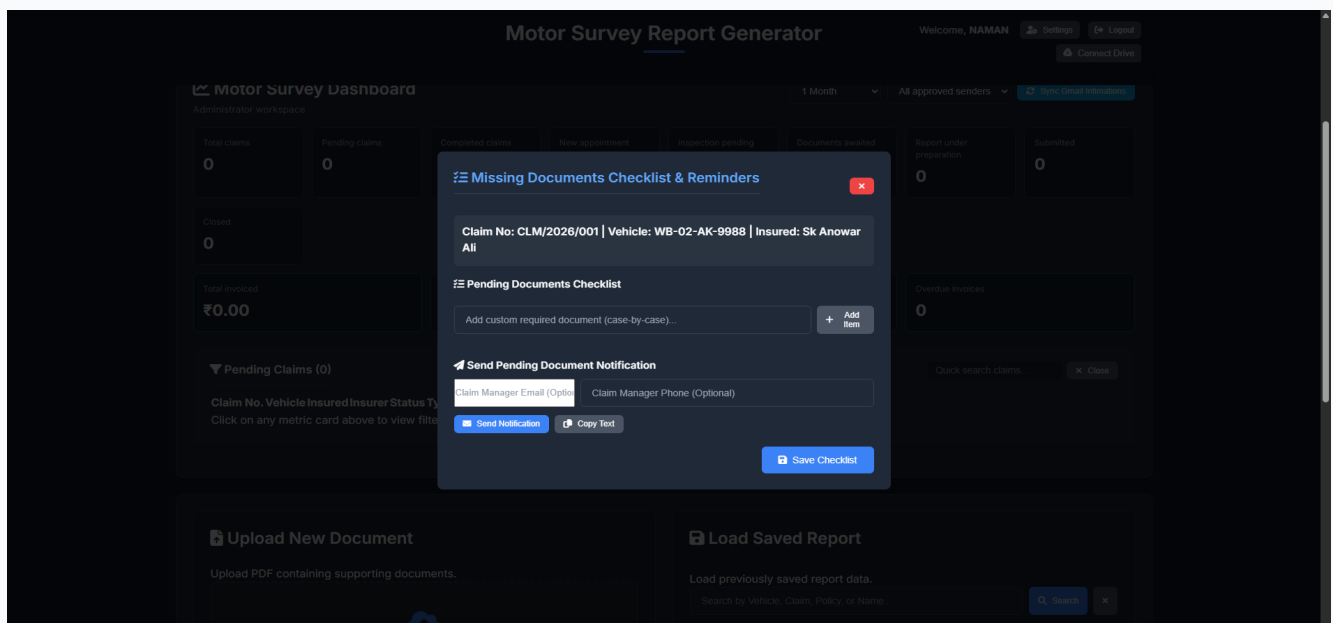

Figure: Requirement R2: Pending documents checklist modal with instant status toggles and reminder tracking

Feature 3: Master Insurer Directory & Setup (Requirement R3)

- Where to Find:** In the Survey Fee Register, click '+ Manage Insurer Masters' (.open-insurer-master-modal-btn).
- How it Works:** Allows storing Insurer Name, Branch Address, GSTIN, Default Rate/Km, and Invoice Prefix. Selecting an insurer auto-fills all billing and address fields.

The screenshot displays the 'Motor Survey Report Generator' application. The main header shows 'Welcome, NAMAN' with 'Settings' and 'Logout' buttons. Below the header is the 'Survey Fee Register' section, which includes an 'Upload Policy / RC Copy (PDF)' button and a description: 'Income tracking, GST billing, GST export, and CA reports.' The 'Insurer Master Auto-Fill & Setup' modal is open, showing a 'Select Insurer Master' dropdown menu. The modal also includes fields for 'Insurer *', 'Insurer GSTIN', 'Insurer Branch Address', and 'Insured name *'. The 'Invoice No (Auto-Prefix)' field shows 'e.g. NIC-0001, OGI-0001'. The 'Invoice Date' field shows 'dd-mm-yyyy'. The 'Conveyance Charges (Flat Rate & Distance Km Formula)' section includes a 'Flat Rate Conveyance (Rs.)' field, a 'Km Formula' dropdown set to 'One-Way Km', a '10' input field, a '1 Visit' dropdown, and a 'Dist Total: Rs. 0' field. The 'Total Conveyance (Flat + Dist):' field shows 'Conveyance Total'. The 'Due Date' field shows 'dd-mm-yyyy'. The 'Photocopy / Other chai' field shows '18'. The 'Unpaid' and 'Draft' dropdowns are also visible.

Figure: Requirement R3: Master insurer configuration modal for managing branch offices, GSTINs, and default rates

Feature 4: Smart Auto-Prefix & Sequential Invoice Numbering (Requirement R4)

- Where to Find:** In the Survey Fee Register form under the Insurer input field.
- How it Works:** Typing 'National Insurance Company' auto-derives 'NIC' prefix and auto-fills the next sequential invoice number (e.g. NIC-0001).

The screenshot displays the 'Motor Survey Report Generator' application. The main header shows 'Welcome, NAMAN' with 'Settings' and 'Logout' buttons. Below the header is the 'Survey Fee Register' section, which includes an 'Upload Policy / RC Copy (PDF)' button and a description: 'Income tracking, GST billing, GST export, and CA reports.' The 'Insurer Master Auto-Fill & Setup' modal is open, showing a 'Select Insurer Master' dropdown menu. The modal also includes fields for 'Insurer *', 'Insurer GSTIN', 'Insurer Branch Address', and 'Insured name *'. The 'Invoice No (Auto-Prefix)' field shows 'NIC-0001'. The 'Invoice Date' field shows 'dd-mm-yyyy'. The 'Conveyance Charges (Flat Rate & Distance Km Formula)' section includes a 'Flat Rate Conveyance (Rs.)' field, a 'Km Formula' dropdown set to 'One-Way Km', a '10' input field, a '1 Visit' dropdown, and a 'Dist Total: Rs. 0' field. The 'Total Conveyance (Flat + Dist):' field shows 'Conveyance Total'. The 'Due Date' field shows 'dd-mm-yyyy'. The 'Photocopy / Other chai' field shows '18'. The 'Unpaid' and 'Draft' dropdowns are also visible.

Figure: Requirement R4: Smart uppercase acronym auto-prefixing (NIC-0001, OGI-0001) and sequential numbering

Feature 5: Professional Fee Stepper & Live Calculation Summary (Requirement R5)

- Where to Find:** In the Survey Fee Register form under professional fee and conveyance inputs.
- How it Works:** Enforces whole-rupee increments (step=1). Real-time summary card dynamically computes Taxable Amount, 18% GST, and Gross Total.

Live Calculation Mathematical Formula

Taxable Amount = Professional Fee + Total Conveyance + Photocopy Charges
GST (18%) = Taxable Amount x 0.18
Gross Total = Taxable Amount + GST (18%)
Example: Rs. 1,500 (Prof) + Rs. 500 (Conv) + Rs. 200 (Photo) = Rs. 2,200 Taxable | Rs. 396 GST | Rs. 2,596 Gross Total

Feature 7: Dual-Role Team Permissions & Financial Redaction

- Administrator Role (NAMAN):** Full unrestricted access to operational claims, fee registers, GST exports, user accounts, and billing masters.
- Employee Role (USER):** Operational access for claim registrations and report drafting. Survey Fee Register tab and revenue metrics are completely hidden and API blocked (403 Forbidden).

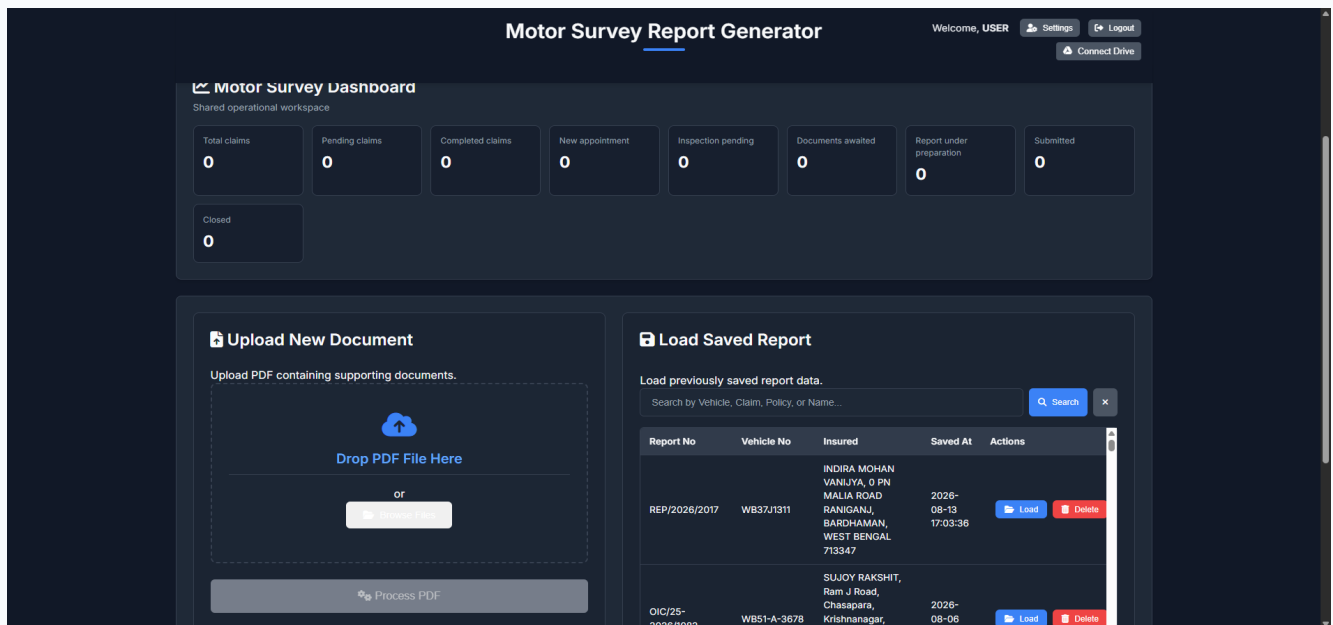

Figure: Role Partitioning: Complete financial fee register redaction and revenue KPI hiding for employee accounts

3. Automated Backups & System Maintenance

- Daily Nightly Backup Cron:** Automatically executes pg_dump to /root/backups/ every night and purges backups older than 14 days.
- Automated SSL Renewal:** Let's Encrypt SSL certificates renew automatically via certbot.timer on Nginx.
- Push-to-Deploy Webhook:** Every GitHub commit automatically triggers /api/deploy-webhook, updating the site in ~3 seconds.

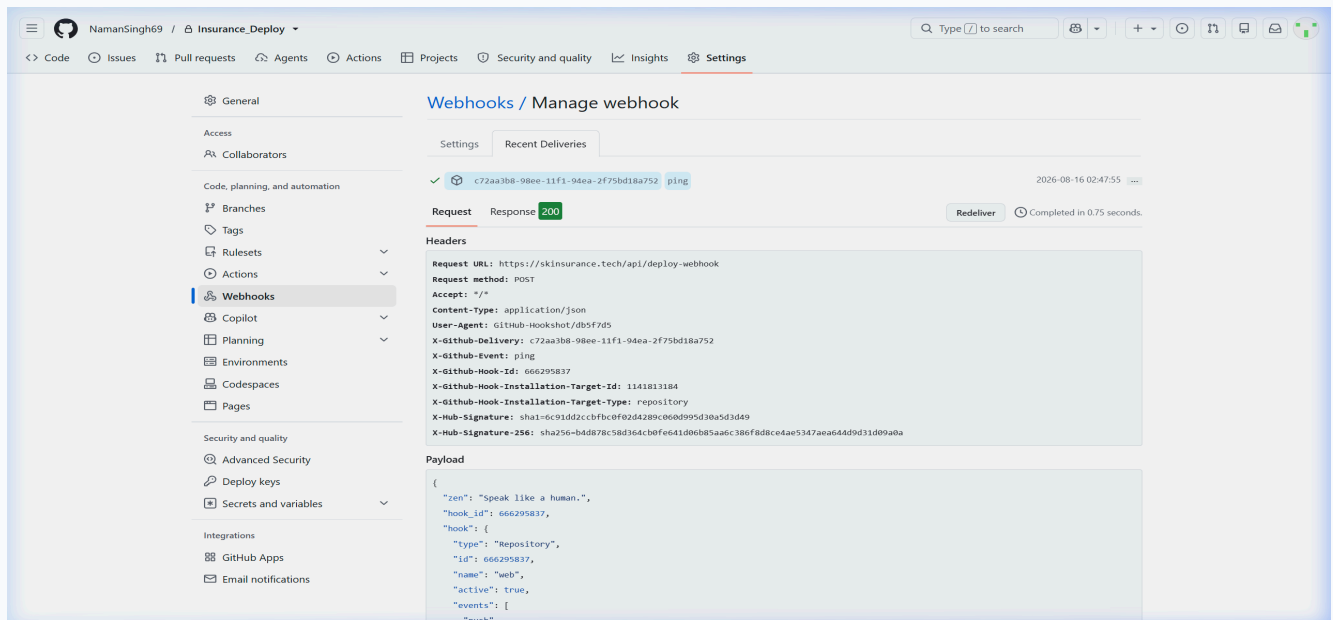

Figure: Automated CI/CD: Verified GitHub Webhook push-to-deploy pipeline (HTTP 200 OK in 0.75s)

4. User Credentials & Access Summary

The table below details default login credentials and permission scopes configured on <https://skinsurance.tech>:

Account Role	Username	Default Password	Permitted Capabilities
Administrator	NAMAN	69420	Full Access (Operations, Fee Register, GSTR-1, Settings)
Employee / Staff	USER	UH65A#DF	Operational Access (Claim Register, Survey Reports, PDF Download)

Client Operational Advice

- Password Customization: Passwords can be changed anytime via Settings -> User Profile.
- Browser Caching: Asset cache-busting (?v=commit_sha) ensures updates reflect immediately without clearing browser cache.
- Client Support: For assistance or custom report template modifications, contact the developer.
